River Publishers

Handbook of Facility Assessment

Author: James E. Piper

This practical guide is designed for facility and maintenance managers who are facing “repair or replace” decisions for their buildings. Filled with useful information and resources to aid in the decision process, this hands-on reference shows readers how to accurately rate the condition of existing equipment and components, effectively assess their options, and avoid making costly mistakes. Detailed step-by-step instructions are provided, along with forms listing specific criteria identified for rating each building component. Topics include the assessment process; building site, shell, and interior; HVAC, plumbing, electrical, transportation, and safety systems; and more.
