Enabling Metaverse and Telepresence Services in 6G Networks

Authors:

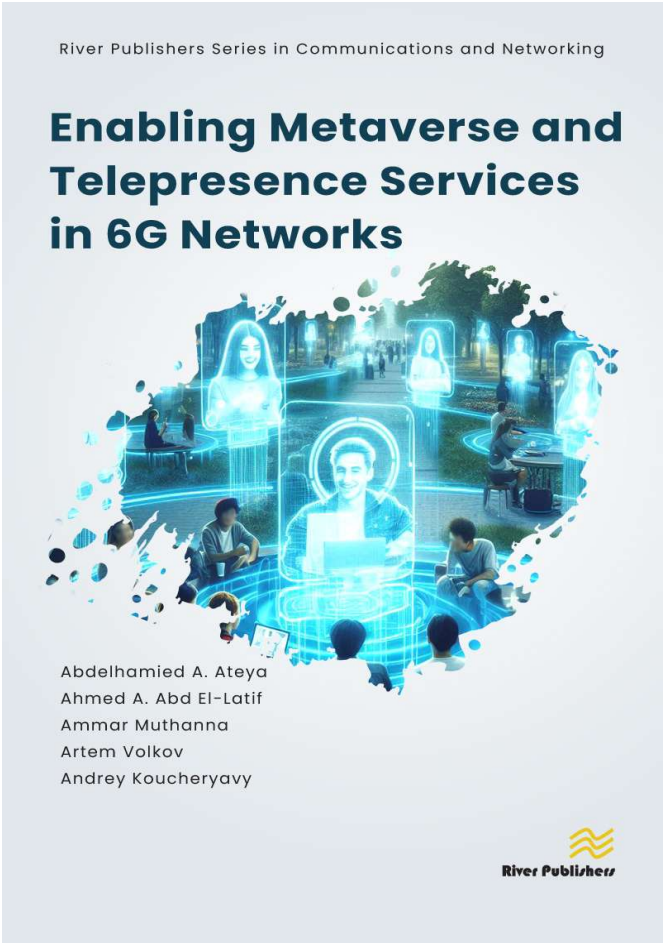

Abdelhamied A. Ateya, Prince Sultan University, Saudi Arabia; Zagazig University, Egypt

Ahmed A. Abd El-Latif, Prince Sultan University, Saudi Arabia; Menoufia University, Egypt

Ammar Muthanna, SPbSUT, Russia

Artem Volkov, SPbSUT, Russia

Andrey Koucheryavy, SPbSUT, Russia

The world is on the cusp of a transformative era, driven by the convergence of 6G networks, the metaverse, and telepresence technologies. This book delves into the heart of these advancements, exploring their potential to revolutionize communication and unlock entirely new avenues for collaboration, learning, and social connection.

Inside, you'll discover:

- The science behind augmented and virtual reality (AR/VR)
- The fascinating world of holographic images
- The intricate workings of holographic technology
- The role of key players like HTC Communications
- The communication networks necessary for telepresence and holographic communication
- Methods for testing and assessing the quality of holographic image transmission
- Research directions and future possibilities.

TABLE OF CONTENTS

- Introduction
- AR/VR and Metaverse
- Holographic Images
- Holographic Tech Explained
- HTC in Future Networks
- Telepresence and Holographic Networks
- Testing Holographic Transmission
- Holographic Image Quality
- Network Testing for Immersive Experiences
- Research Directions

River Publishers Series in Communications and Networking

ISBN: 9788770046732
e-ISBN: 9788770046725
Available From: May 2025
Price: $ 130.00

KEYWORDS:
6G, metaverse, telepresence, AR/VR, holographic imaging, HTC, communication networks, immersive experiences, network testing
