River Publishers

Mechanics of Biological Systems and Materials & Micro-and Nanomechanics & Research Applications

Proceedings of the 2020 Annual Conference on Experimental and Applied Mechanics

Editors:

Jacob Notbohm, The Society for Experimental Mechanics, Bethel, USA

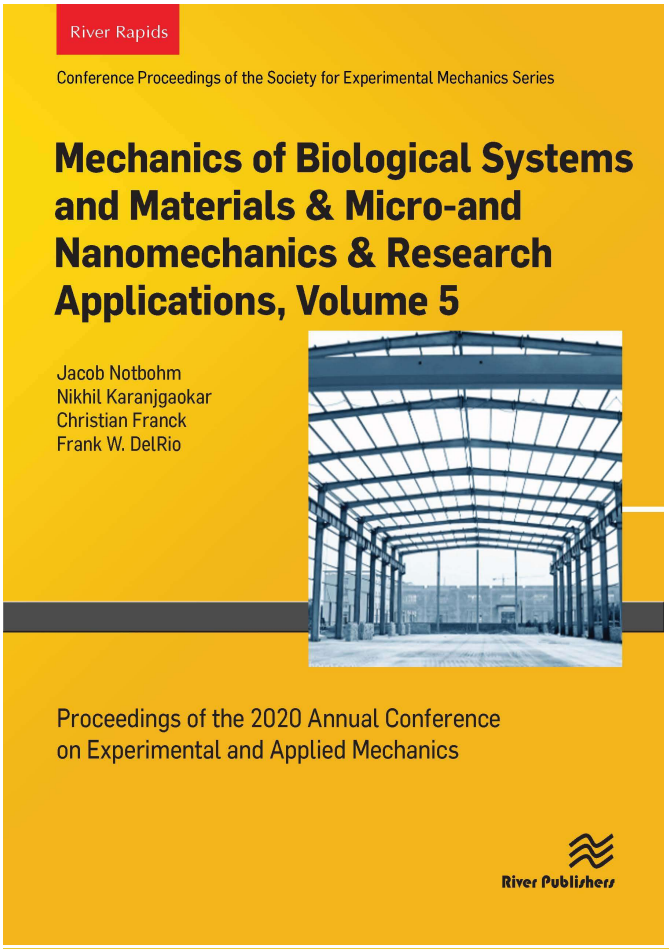

Nikhil Karanjgaokar, The Society for Experimental Mechanics, Bethel, USA

Christian Franck, The Society for Experimental Mechanics, Bethel, USA

Frank W. DelRio, The Society for Experimental Mechanics, Bethel, USA

Mechanics of Biological Systems & Micro-and Nanomechanics, Volume 5 of the Proceedings of the 2020 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the fifth volume of seven from the Conference, brings together contributions to important areas of research and engineering. The collection presents early findings and case studies on a wide range of topics, including:

- Cell Mechanics & Traumatic Brain Injury
- Micromechanical Testing
- Adhesion and Fracture
- MEMS Devices and Technology
- Nano-scale Deformation Mechanisms
- 1D & 2D Materials
- Tribology & Wear
- Research and Applications in Progress
