River Publishers

Challenges in Mechanics of Time Dependent Materials, Mechanics of Biological Systems and Materials & Micro-and Nanomechanics, Volume 2

Proceedings of the 2021 Annual Conference and Exposition on Experimental and Applied Mechanics

Editors:

Alireza Amirkhizi, The Society for Experimental Mechanics, Bethel, USA

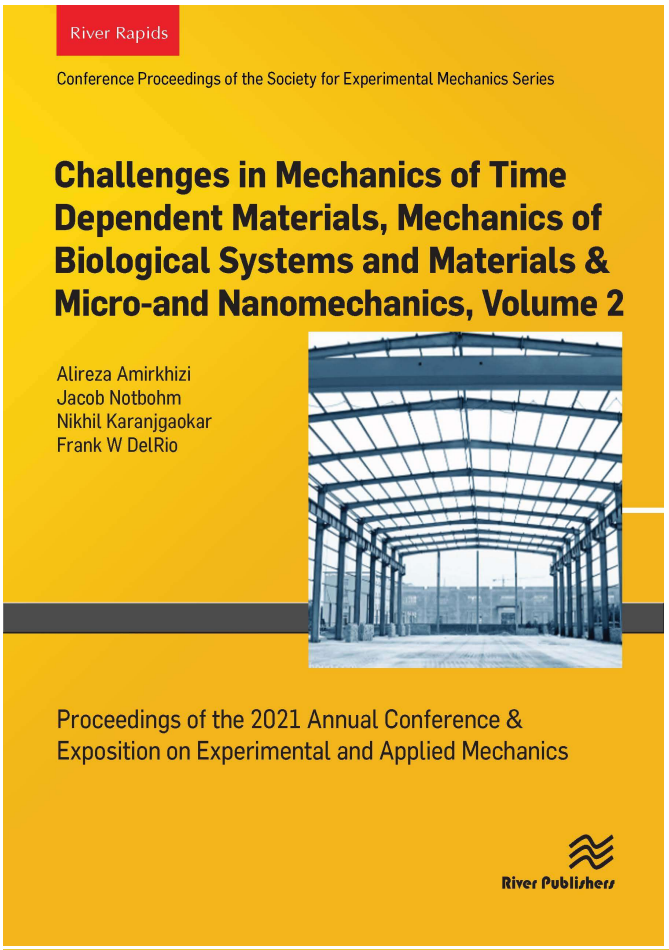

Jacob Notbohm, The Society for Experimental Mechanics, Bethel, USA

Nikhil Karanjgaokar, The Society for Experimental Mechanics, Bethel, USA

Frank W DelRio, The Society for Experimental Mechanics, Bethel, USA

Challenges in Mechanics of Time-Dependent Materials, Mechanics of Biological Systems and Materials, and Micro-and Nanomechanics, Volume 2 of the Proceedings of the 2021 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the second volume of four from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Experimental Mechanics, including papers in the following general technical research areas:

- Characterization Across Length Scales
- Extreme Conditions & Environmental Effects
- Damage, Fatigue and Fracture
- Structure, Function and Performance
- Rate Effects in Elastomers
- Viscoelasticity & Viscoplasticity
- Research in Progress

River Publishers Series in Conference Proceedings of the Society for Experimental Mechanics Series

e-ISBN: 9788743803898
Available From: December 2021
