River Publishers

Challenges in Mechanics of Biological Systems and Materials, Thermomechanics and Infrared Imaging, Time Dependent Materials and Residual Stress, Volume 2

Proceedings of the 2023 Annual Conference on Experimental and Applied Mechanics

Editors:

Christian Franck, The Society for Experimental Mechanics, Bethel, USA

Karen Kasza, The Society for Experimental Mechanics, Bethel, USA

Jon Estrada, The Society for Experimental Mechanics, Bethel, USA

Rosa De Finis, The Society for Experimental Mechanics, Bethel, USA

Geir Olafsson, The Society for Experimental Mechanics, Bethel, USA

Suhasini Gururaja, The Society for Experimental Mechanics, Bethel, USA

Jevan Furmanski, The Society for Experimental Mechanics, Bethel, USA

Aaron Forster, The Society for Experimental Mechanics, Bethel, USA

Pavan Kolluru, The Society for Experimental Mechanics, Bethel, USA

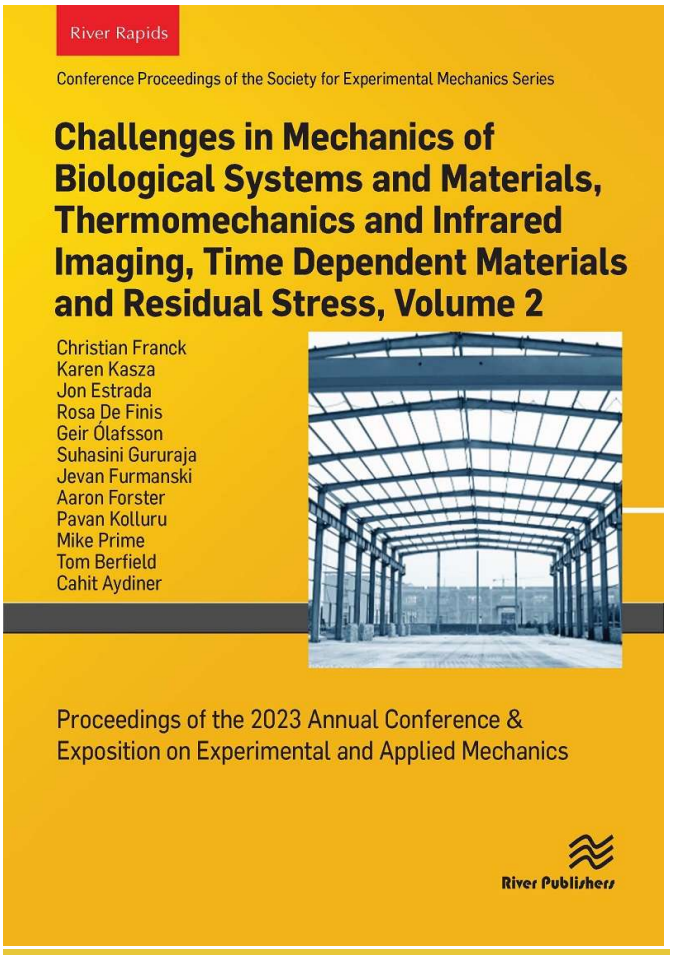

Mike Prime, The Society for Experimental Mechanics, Bethel, USA

Tom Berfield, The Society for Experimental Mechanics, Bethel, USA

Cahit Aydiner, The Society for Experimental Mechanics, Bethel, USA

Challenges in Mechanics of Biological Systems and Materials, Thermomechanics and Infrared Imaging, Time Dependent Materials and Residual Stress, Volume 2 of the Proceedings of the 2023 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the second volume of five from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Experimental Mechanics, including papers in the following general technical research areas:

- Advanced Thermographic Techniques for SHM
- AM Composites and Polymers
- Experimental Techniques in Biomechanics and Mechanobiology
- Inverse Methodologies and Uncertainties in the Identification of Residual Stresses, Residual Stress IV
- Low Cost Thermographic Applications
- Multiscale Mechanics of Biological Materials
- NDE and Process Monitoring
- Residual Stress
- Thermomechanics
- Time Dependence in Porous and Soft Materials
