River Publishers

Recent Advancements and Emerging Technologies in Multi-level Inverters

Editors:

Kundan Kumar, National Institute of Technology, Jamshedpur, India
Ambrish Devanshu, National Institute of Technology, Silchar, India
Subrata Banerjee, National Institute of Technology, Durgapur, India
Lairenlakpam Robindro, CSIR-Indian Institute of Petroleum, India
Sheldon S. Williamson, Ontario Tech University, Canada

This book provides a comprehensive exploration of the latest innovations and trends in multi-level inverter technology. It delves into cutting-edge designs, control strategies, and applications of multi-level inverters in renewable energy systems, electric vehicles, and industrial automation. It combines theoretical foundations with practical insights, offering readers a holistic understanding of inverter operation and performance optimization. Designed for researchers, students, and industry professionals, the book highlights advancements in power electronics and their role in addressing modern energy challenges. With detailed analyses and real-world case studies, this is an essential resource for anyone interested in the future of energy conversion and sustainable technologies.

River Publishers Series in Power

ISBN: 9788770041430
e-ISBN: 9788770041133
Available From: June 2025
Price: $ 140.00

KEYWORDS:
Asymmetric inverter, modular multi-level converters, multi-level inverters, powertrain, renewable energy systems, switched capacitors
