River Publishers

Battery Technologies for E-Mobility

Innovations, Applications, and Advanced Management Systems

Editors:

Akash Samanta, Ontario Tech University, Canada

Sheldon Williamson, Ontario Tech University, Canada

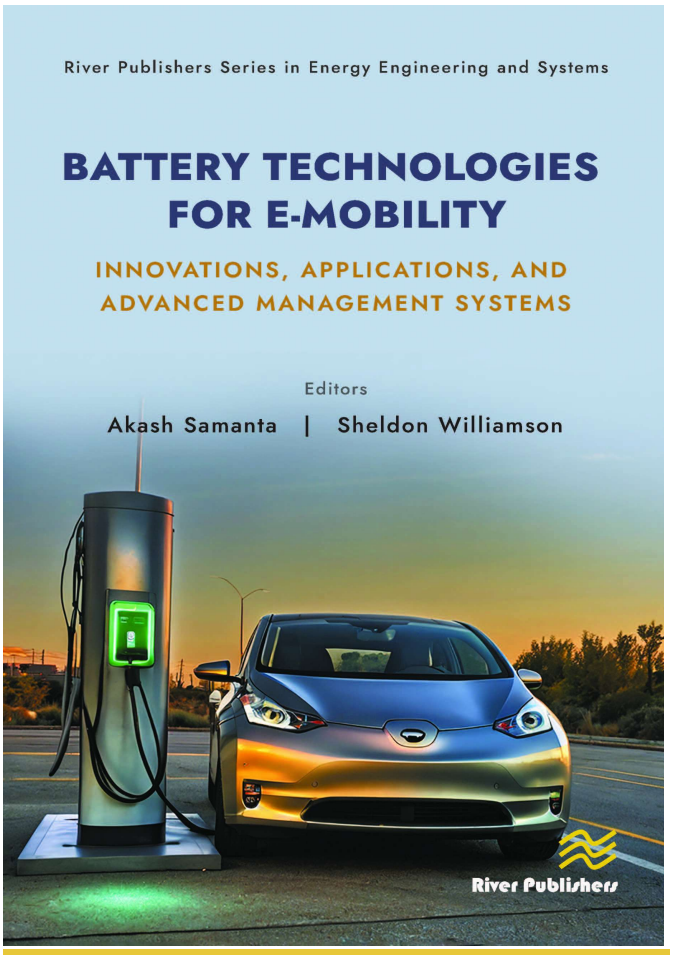

This book is a panoramic view of the innovations propelling the electric revolution. In the ever-evolving landscape of electric mobility, the triumphant fusion of batteries, smart-charging systems, and advanced battery management solutions are of utmost importance. *Battery Technologies for E-Mobility* unravels the intricate tapestry of battery technologies from their origins in electrochemistry to the cutting-edge of lithium-one and far beyond. It delves deep into the heart of smart charging networks and exposes the symbiotic dance between sustainable energy integration and optimized EV ecosystems.

This book encapsulates the collective wisdom of leading experts, offering a cross-disciplinary exploration that caters to researchers, engineers, students, and industry professionals. As the world races towards sustainable transportation solutions, it will guide you through the realms of innovation that are shaping the electrified roads of tomorrow. You will also grasp the reins of advanced battery management systems, where monitoring, control, and safety converge to extend battery lifespans and performance horizons.

Join us on this trek – a journey that unveils the convergence of technologies driving e-mobility, and that challenges you to imagine the boundless possibilities that lie ahead.

TABLE OF CONTENTS

1. Electrical Energy Storage Systems
2. Battery Testing, Characterization, and Modelling
3. Battery Management System
4. Cell Balancing Techniques
5. Thermal Management of Electric Vehicle Power Train
6. Smart Charging of Electric Vehicle
7. Application of Machine Learning, Internet of Things, and Digital Twin in Battery Storage
8. Electric Vehicle as Decentralized Energy Storage System

River Publishers Series in Energy Engineering and Systems

ISBN: 9788770040860
e-ISBN: 9788770040853
Available From: December 2025
Price: $ 150.00

KEYWORDS:
Transportation electrification, machine learning, battery charging, thermal management, battery modeling, internet of things, battery digital twin
