River Publishers

Mechanics of Additive and Advanced Manufacturing, Inverse Methods and Machine Learning, Volume 5, 2026

Editors:

Piyush Thakre, Dow Inc., TX, USA

Nha Uyen Huynh, San Diego State University, CA, USA

Patricio Carrion, Sandia National Laboratories, NM, USA

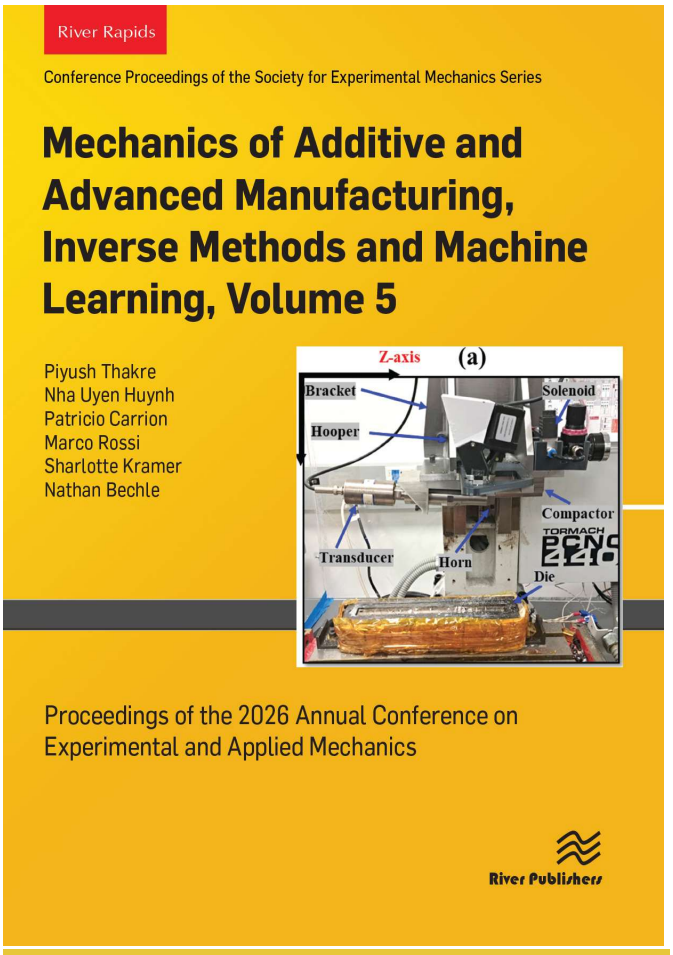

Marco Rossi, Universita Politecnica Delle Marche, Italy

Sharlotte Kramer, Sandia National Laboratories, NM, USA

Nathan Bechle, Forest Products Laboratory, WI, USA

Mechanics of Additive and Advanced Manufacturing, Inverse Methods and Machine Learning, Volume 5 of the Proceedings of the 2026 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the fifth volume of five from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies, including:

- Additive manufacturing
- Metal AM processes (binder jet, L-PBF)
- Solid-State Consolidation
- Laser Shock Peening
- Solid-State Feedstock Consolidation
- Underwater Printable Concrete
- Inverse FE Approaches for Material Characterization

River Publishers Series in Conference Proceedings of the Society for Experimental Mechanics Series

ISBN: 9788743816232
e-ISBN: 9788743815983
Available From: October 2026
Price:

KEYWORDS:
Solid-state consolidation, Cyclic shear, feedstock Binder jetting â˜™ IN625 â˜™ Layer thickness Biodegradable materials, sustainable construction Laser shock peening, residual stress, AM Ti-6Al-4V Dynamic, Cast Iron underwater, additive manufacturing, UHPC, rheology
